- Computer Networks
- Database Management Systems

PROFILE

An aspiring person to contribute my technical expertise and innovative mindset as a valuable member of the organization, collaborating with a dynamic team to develop groundbreaking solutions and drive positive change

PROJECT EXPERIENCE:

1. DISCIPLINE MANAGMENT SYSTEM

- Developed an intuitive interface for our college management software, incorporating a ticket-based system for complaints and role-based authentication for security
- Designed this software using HTML, CSS, for front-end development while PHP and MySQL for back-end operations.

PROJECT:

1.USER AUTHENTICATION SYSTEM

- Developed a robust secured authentication system that ensures that only authorized persons can access a specific information or perform specific task in a digital environment.
- This whole project was developed using React JS for the frontend, Express JS, Node JS for the backend and Mongo DB as the database.
